

<b>Project Title:</b>	PACT Publications
<b>Period:</b>	March through August 2001
<b>Client:</b>	PACT Publications
<b>Complexity:</b>	1 databases, 6 tables, 50 Meg of live data. 30 ASP pages, 500 lines of code.
<b>Technology:</b>	IIS 5.0 ASP Microsoft Access
<b>Summary:</b>	<p>PACT Publications is a non-profit company that sells publications to assist non-governmental organizations (NGO) in third-world development and education.</p> <p>The project is a straightforward shopping cart system with some custom modifications. A front page highlights new and best selling books and publications as conditions change. Many publications are available in a variety of languages and many are not available until ordered, so in-stock status is crucial.</p> <p>Additional functions include administrative pages for stock and invoice management, a mailing list management program and tools for editing the front page content.</p> <p>Code Gurus was the sole developer for the application and database. Graphical design was performed by Dragonfly Communications.</p>
